

Have you ever seen a person struggle despite working full-time? Or seen an ex-serviceman sleeping alone and cold on a doorstep? Unfortunately, the common answer is yes to both of these questions however, we are the party that will strive to solve these issues.

Before, our party can tackle these issues within our country we must address the elephant in the room, Brexit. Our party believes, this is not a problem nor a hurdle but, a solution. Our deal for Brexit would consist of us gaining control of all of our laws. As a country we must develop our relationship with economic powerhouses like America and China.

Unfortunately, our party believes that some immigrants that live and work here are being placed under a horrible situation. We intend to have open borders and benefits for all immigrants, that seek asylum in our great land. While on the topic for our fierce workforce, our party believes in equal pay for all, man nor woman, English or foreign, young or old, our workforce deserves equality for all.

Another issue our party would like to address immediately is homelessness. This issue is growing in our country at an alarming rate. We as one pledge schemes to help homeless people get access to council housing, education and job advice for free. Furthermore, I would like to introduce the EFE (Education For Everyone) scheme which is a 6-month programme completely free providing homeless people a chance to develop their lives and financial skills.

Did you know over the last nine years of Tory tyranny, 33% of the NHS was privatised? No. No one did, because this was all hidden and classified from us. The entire transport sector was sold to transport giants like TNT. These are owned by Eddie Stobart, that big American conglomerate, this answers our party's and the country's biggest fear. The conservative party are slowly dismembering the NHS and selling it to the highest bidder. We pledge that the NHS is not on the table for anyone. **IT IS NOT FOR SALE!**

Our party also feels that a Scottish independence referendum is not in the best interests of either of our countries. We believe us as a team would help save our citizens from poverty. However, this is not the case for Northern Ireland. We believe the political and religious issues have settled and there would be no damage created if a vote is set up to make Northern Ireland once more a part of the Republic of Ireland.

The obvious question is, where will all of this money come from? We as party believe the wealth should be divided equally to abolish poverty. We will raise the tax on wages above 100,000 pound a year. Moreover, we will increase Corporation tax for all major conglomerates. Our party also believes our country will benefit, heavily through the legalisation of cannabis. Just to clarify this will be sold in licensed and regulated heavily in certain stores. This will end the war on drugs and will overall decrease drug related crimes. Finally, we intend to increase the VAT on products over 1000 pounds.

I hope this letter has clearly outlined our main issues and solutions from our manifesto. Also, we hope this has shown that the Transform Party is the greatest choice for our country.
